

2023 - 2024

A Snapshot of The Land Institute

We continue to scale the development of deep-rooted perennial grain crops to nourish people while protecting the future of our planet.

Your support provides hope, rooted in science, to create a truly regenerative food system.

BY THE NUMBERS

739,953 lbs of Kernza® grain

stored and ready to use in
food and beverage products

2,000 lbs of soil cores

collected with the USDA Natural Resource Conservation
Service for the Kernza Carbon Network Project

229 civic scientists

in 47 states collecting perennial grain
data across 3 projects

65 employees

across 10 states catalyzing the global
perennial agriculture movement

40+ breweries & taprooms

in the United States serving and distributing
beer made with Kernza® perennial grain

29 researchers

from 21 institutions across 8 countries
agree that high-yielding perennial grains
are possible and imminent

18 scientific papers

published by our researchers in 2023

1st official delegation

from The Land Institute to attend COP28, the
United Nations Climate Change Conference
