

BEER TASTING & FILM *event*

Join us as Prairy screens the award-winning short film *Beer Saves The World!* Spearheaded by environmental leaders like Patagonia, this feature follows the story of Kernza,[®] the world's first trademarked perennial grain, highlighting the advocates who research it, grow it, plus the brave individuals who make beer with it.

Stick around after the picture to taste a variety of locally-brewed beers made with Kernza.[®]

Discover the grain that has the potential to feed the world, heal the soil,
AND wash down your favorite food!

SAT, OCT 11; NOON
